

Car Cruise Control System

- Last updated: 3/06/18
- Language: Esterel
- Kernel: Linux

Authors

- Leighton Jonker: ljon139
- William Chao: wcha609

Device Compatibility:

- Machines with Linux OS on them.

Software Requirements:

- [Esterel]
-

How to run the cruise control system:

- Open the command line
- Navigate to `/.../CMPSYS723A2/src/`
- Type in the command `"make cruisecontroller.xes"`
- Then type in `"./cruisecontroller.xes"`
- The Esterel boxes should appear by now; edit the inputs and variables and press tick to simulate the program
